

Product information

Skin Care

Skin Care is a lotion with high-quality care components: natural camomile active ingredient (α-bisabolol), AND-panthenol, keratin, vitamins A and E and natural oils. PH-neutral, fragrant and silicone-free.

Bardahl Skin Care contains an optimal system of skin-related and natural oils (almond oil, peanut oil). It contains high-quality fabrics:

- Natural α-bisabolol, an anti-inflammatory medicine of chamomile. This ingredient can prevent inflammation as well as prophylactic skin spots and negative environmental influences.
- D-panthenol is a good skin permeable provitamin of pantothenic acid (Vit.B5). D-panthenol works anti-inflammatory and promotes wound healing, promotes epithelization, cell division and skin pigment growth.
- Keratin, of natural origin, is a high-quality protective protein for the skin. It keeps the skin moist and ensures the maintenance of skin elasticity.
- Natural, vitamin E (α-tocopherol), with a high biological activity, improves the relief of the skin surface, reduces skin damage caused by free radicals and thus slows the aging process of the skin.
- With regular use, the natural effect of UV light protection is improved. Wound healing can be promoted and itching is reduced.
- Vitamin A promotes enzyme activity of the skin and builds up the epidermis, that is, collagen. It also supports the regeneration of UV-aged skin.
- Special moisturizing creams regulate the moisture content of the skin and also prevent strong dehydration.

The use of these high quality ingredients makes it an ideal skin care product of exceptional quality for every skin type.

Skin Care:

- nourishes and protects the skin and gives it a natural, beautiful appearance.
- is silicone-free.
- is pH skin neutral.
- has been dermatologically tested.
